

## 960HT31 | Flashcut machine tap HSSE-PM -HC coated -M -TivolyNorm -C Shape -6H

High performance tap (sintered steel) for refractory steels and alloys. HC coating gives the tap a very high hardness and an increased service life.

- Especially for refractory alloys
- Made in Spain
- Spiral flute
- HC coating

### Machine

### Application

N 3.2	N 3.4	P 2.4	S 1
N3-2- Copper- brass alloy with pb ≤ 1%	N3-4- Copper- Bronze Alloy	P2-4- Weakly alloyed deciotage steels	S1- Iron- based alloy

### Features

### Properties and benefits

- + Spiral flute : A flute shape that allows chips to be evacuated through the entrance to the hole. ➡ Allows better heat resistance due to better chip evacuation. For blind holes.
- + HC coating : Hardness 3300HV, coefficient of friction 0,25, resistance to heat (900°C). ➡ Very high hardness. Increased tool life.
