

1037171 | Carbide file milling cutter -TivolyNorm -Normal cut -Chipping cutter -D shape

High performance carbide file cutter milling. Versatile use thanks to its substrate and diamond tooth geometry. Made in France.

- Especially for high-strength steels, stainless steels and cast irons
- Especially for weld bead
- Economical burr
- Cylindrical shank
- Chip breaker teeth
- Carbide head

Machine

Application

K- Ferrous
Cast iron
with Short
Chips

M-
Stainless
steels

S- Super
Refractory
Alloys

Features

Properties and benefits

- + Cylindrical shank: the diameter of the shank is equal to the diameter of the tip. ➡ Enables versatile use on portable electrical tools and CNC machine tools.
- + Chip-breaking teeth: teeth designed for their high versatility, diamond cutting for the excellent breaking up of chips. ➡ Enables the effective filing of the majority of metals, excellent chip breaking, and neat surface conditions.
- + Tungsten carbide head: ground in a grade of carbide especially suited for high rotation speeds. ➡ Enables an excellent throughout rate and very high resistance to wear, suitable for very high rotation speeds in the majority of metals.
