

1037191 | Carbide file radius cutter -TivolyNorm -Normal cut -Chip cutter -D shape

High performance carbide file cutter milling. Versatile use thanks to its substrate and diamond tooth geometry. Made in France.

- Especially for high-strength steels, stainless steels and cast irons
- Especially for weld bead
- **Economical burr**
- Cylindrical shank
- Chip breaker teeth
- Carbide head

Machine

Application

K- Ferrous Cast iron with Short Chips

on Stainle ort steels

Refracta Allovs

Features

Properties and benefits

- Cylindrical shank: the diameter of the shank is equal to the diameter of the tip. Enables versatile use on portable electrical tools and CNC machine tools.
- + Chip-breaking teeth: teeth designed for their high versatility, diamond cutting for the excellent breaking up of chips. Enables the effective filing of the majority of metals, excellent chip breaking, and neat surface conditions.
- + Tungsten carbide head: ground in a grade of carbide especially suited for high rotation speeds. Enables an excellent throughout rate and very high resistance to wear, suitable for very high rotation speeds in the majority of metals.
