

The Torsion TiN bit for intensive screwing. TiN coating to prevent premature wear. Torsion effect.

- Breakage-resistant tool
- Maximum long life
- Intensive and repetitive work
- Quick-change shank
- With colored ring
- TiN coating
- Torsion breakage-resist.

Machine

Features

Properties and benefits

- + Quick-Change hex attachment: a hexagonal recessed attachment for the quick locking and unlocking of the bit. Compliant with the DIN 3126 E6.3 standard ➡ Enables the quick changing of your bits by doing away with the manual tightening/loosening of the chuck. For drills and screwdrivers.
- + With different color rings depending on the screw heads ➡ For the simple and fast recognition of screw head types. Each screw head has its own colour code
- + TiN coating: surface treated with titanium nitride, for resistance to wear. ➡ Enables greater longevity of the screwdriver bit and protection against corrosion.
- + Break-resistant twist: reduced central geometry and special thermal treatment that absorbs peak screwing forces and extreme torque variations. ➡ Prevents the premature breakage of the bit, as well as its premature wear, for a longer service life.

Sets

48 pieces - 47 TiN coated bushed torsion bits + 1 magnetic Quick-Change bit holder
