

# 1T50362 | Jigsaw blade - For parquet - T attachment TECHNIC (Blister)

Bi-metal, the perfect combination of flexibility (HSS "spring" steel), and durability (welded HSS teeth). Head treated in a vacuum furnace. Suitable for wood & metal working.

## TIVOLY \$ > PARQUET • Laminated floor

- Cross ground, tapered
- HSS toothing

#### Machine

#### **Application**

#### **Features**

### **Properties and benefits**

- + Cross ground, tapered: each tooth is perpendicular to the cutting axis, is aligned, and cuts along its entire width. The sides and the back are tapered. 

  Enables fast and straight cutting. The blade does not come back into contact with the material and enables a fine and clean cut.
- + Bi-metal steel blade: combination of progressive toothing made from quick-cutting tempered steel (HSS), and the body made from high-strength carbon steel (HCS). Very flexible, used when there is a risk that the attachment will break. Very high resistance to wear, for a longer service life.
