

## 1T50422 | Jigsaw blade - Laser cut - For solid hardwood - U attachment TECHNIC (Blister)

High-alloy vanadium chrome steel is used for working on softer materials such as wood, fiberboard panels, and synthetic materials.

- Cross ground, tapered
- Laser cut
- Carbon steel toothing

## Machine

Terrace

**Features** 

## **Properties and benefits**

- + Cross ground, tapered: each tooth is perpendicular to the cutting axis, is aligned, and cuts along its entire width. The sides and the back are tapered. Enables fast and straight cutting. The blade does not come back into contact with the material and enables a fine and clean cut.
- Laser cut: laser cut rectangles along the entire length of the blade. 
  ➡ Enables clean, precise, and straight cutting on a surface with low friction. Simple chip removal, for faster cutting.
- ♣ Blade made from HCS carbon steel: high-strength carbon steel ideal for cutting into soft wood and non-abrasive carpentry materials. Enables longer service life thanks to the flexibility of the blade.
