

Cutter with 2 industrial quality micro-grain carbide cutting edges. Tool made from special abrasion-resistant steel. Made for demanding jobs.

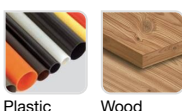

- Straight cutting + guide
- Diamond cut HM blades
- Ø8 mm shank
- Bearing guide

Machine

Application

Features

Properties and benefits

- + For flush straight cutting + guide: cylindrical milling cutter with bearing guide ➡ Allows you to trim the surfaces of the wood .
- + Diamond cut HM blades: cut micro-grain tungsten carbide blade for a diamond grinding wheel. ➡ Enables simple and precise work on hard or soft woods, melamine-coated woods, laminated woods, and plastics. Offers a clean cut, and comfortable cutting.
- + Ø8 mm attachment: rectified cylindrical shank with an 8 mm diameter, standard, without flats. ➡ Suitable for routers with an 8 mm bit-holder.
- + Bearing guide: guide ball bearing at the end of the cutter. ➡ For simple guidance and precise cutting on the surface of the wood. Interchangeable ball bearing.
