

Handy for picking up fallen metal in dark, hard-to-reach areas. Its LED light and long telescopic shaft offer great reach and precision.

The tool has a telescopic shaft which, when unfolded, reaches a length of 81cm. Capable of lifting up to 1kg, the head of the tool is fitted with an LED light that can be switched on and off as required. Batteries are included and can be changed, and a protective cover must be removed when the tool is used for the first time. Last but not least, the ergonomic handle coating ensures an excellent grip.
